<p>Some general rules must be taken into account when choosing courses:</p> <ol style="list-style-type: none"><li>1. courses are offered by the Department and in the ISCED area and level covered by the agreement with Home Institution</li><li>2. we allow students to include courses, with a certain degree of flexibility, from all our 3 Engineering Departments but this is subject to assessment</li><li>3. it is also possible to include a max. of 2 courses from other UNIPI Departments but this is subject to approval from the relevant Erasmus Coordinators</li><li>4. if courses are chosen from different years of course and/or degrees it is highly probable that there will be overlapping of classes</li><li>5. courses are offered in the semester covered by the mobility</li><li>6. Yearly courses ( E ) can eventually be split up in modules but this is subject to approval from the teacher</li><li>7. It is possible to include one or more Italian language courses, for 4 ECTS credits each. Only the first course is free of charge</li><li>8. The possibility to include a final project in the LA is subject to confirmation of availability of a supervisor in Pisa</li><li>9. The majority of our courses are offered in Italian language. The offer in English Language is limited to specific areas and degrees.</li></ol>
