

## 26-30 August 2019, Nancy, France

The Python4NLP summer school targets both computer science and humanities (in particular linguistics) students and scientists, and any other interested persons.

It aims to give the attendees the ability to collect, process and analyse textual data. The school will be Python based and will focus on providing students with a working knowledge of the Python libraries available for collecting, processing, visualizing and analysing textual data.

Classes and tutored hands-on sessions will be complement with invited talks from Albert Gatt and Malvina Nissim and social events.

Details at <https://synalp.loria.fr/python4nlp/>

Pre-registration is open [here](#) until July, 1st.

The Python4NLP summer school is funded by [Lorraine Université d'Excellence](#) and co-organised by the [OLKi IMPACT](#) project ([Christophe Cerisara](#), Aurore Coince) and the [CNRS LIFT Research Network](#) ([Claire Gardent](#)).
